BE-5801 | Salmon Skinner

Perfect Results from Tail to Head.

- Adaptable skinning depths.
- Configurable infeed and outfeed options.
- Low maintenance with easy-to-clean parts.
- For fresh salmon and trout.

BE-5801

The Ultimate Solution for Efficient Skinning

The BE-5801 is designed to meet the specific requirements of salmon and trout skinning operations, integrating seamlessly as either standalone equipment or within existing processing lines.

Made with operational efficiency in mind, the BE-5801 features configurable infeed and outfeed options in

multiple lengths, allowing for optimization according to the unique demands of each facility. User-friendly controls and a robust construction facilitate straightforward operations and maintenance, while the use of high-quality, food-grade materials ensures ease of cleaning and adherence to stringent hygiene standards.

Advanced Features

- ✓ **Easily adjustable** skinning depths during operation for precision processing.
- ✓ **Flexible integration** as standalone equipment or within existing processing lines.
- ✓ **Engineered for operator comfort** with easy adjustments and a quick-release handle.
- ✓ **Easily detachable** parts allow for thorough cleaning and sanitation.

Model	BE-5801
Dimensions LxWxH	1880 x 1075 x 1257 mm
Weight	360 kg
Operators	1 - 2
Voltage Range	220 - 480V 50 - 60Hz
Power Consumption	1.6 kW / 3 ph
Controls	24V
Working width	480 mm
Water Usage	8 liters/m
Water Connection	1/2"
Speed	+/-21 m per min
